

PayEye and GiroMat

ISR & Swiss QR Code Reader from CREALOGIX
For the efficient capturing of payments today and tomorrow

PayEye

Processing of
less than 30 invoices
per payment run

The stylish successor to the popular PayPen is geared towards the future. Orange inpayment slips (ISR) are recorded in a second due to the large scan area. The new Swiss QR Codes are checked with a click and transferred to the financial software or e-banking. PayEye works via Bluetooth, Wi-Fi or USB-C. With the optional Plug & Play Box, PayEye runs without additional software or driver installation. Ideal for Thin Clients, Zero Clients, Remote Desktop System (RDS) or Linux.

GiroMat

Processing of
more than 30 invoices
per payment run

High-performance device for identical capturing of Swiss QR Codes and inpayment slips (ISR). Quiet automatic feed for fast processing of up to 15 documents per minute. GiroMat is equipped with different smart accessories and is built for long lasting endurance. With the optional Plug & Play Box, the GiroMat runs without additional software or driver installation. Ideal for Thin Clients, Zero Clients, Remote Desktop System (RDS) or Linux.
